

Applied Pharmaceutical Innovation (API) is a not-for-profit organization making an impact in the life sciences by bridging the gap between academia and industry.

With a network of over 100 pharmaceutical scientists, clinicians, regulatory, patent, and market experts, API brings life-saving research to the real world.

API helps innovators launch their ideas into the real world, connects industry to the translational science they need for success, and accelerates all aspects of the life science product development process.

## Results since 2017

**75+**

commercial projects

**\$500M+**

in value created for life science companies

**100+**

network experts and advisors

**43+**

SMEs, startups, spinoffs & scale-ups supported

## Our Core Services

Provide industry access to world-class expertise and services

Support researchers and startups to create a viable path forward

Train and empower post-doctoral fellows and students
